

Custom Container Planting Program

We plant your beautiful container garden, and you get a head start on the season!

Here at Tagawa Gardens we specialize in planting custom container gardens.

This service is available from January to mid-March to help ensure your planters will be bursting with beauty by mid-May.

Bring in your *clean empty containers and meet with a member of our Annuals staff who will professionally design your planters to suit your color and plant preferences, as well as sun exposure.

We will carefully nurture your plants with just the right amount of water, fertilizer, and the ideal greenhouse temperatures they need to flourish.

After Mother's Day (or six to eight weeks after you have brought your pots to us), your container gardens will be ready for you to pick up.

We even offer the convenience of delivering your pots to you! (Delivery charges apply and vary depending on distance.)

Custom container pricing is determined by the number and type of plants, along with soil, fertilizer, and a \$75 per hour labor fee.

At a Glance

Bring in ***clean, empty pots** from January to mid-March.

Planters are professionally designed to suit your color, plant preferences, and sunlight .

Containers need eight weeks to grow from the time we plant them until you pick them up.

**For inquiries, please contact Deborah at
(303)-690-4722 (x139), or email Deborah@TagawaGardens.com.**

*Please empty your pots by removing all soil and plant debris and then clean the pot with a 10% bleach solution. If that is not possible, we can clean them for you for a small fee.
