Hosta	<i>Hosta</i>	Sweet Woodruff	<i>Galium</i>
Jacob's Ladder	<i>Polemonium</i>	Vinca	<i>Vinca</i>
Japanese Spurge	<i>Pachysandra</i>		

Note: If a deer or rabbit is hungry enough, they may browse plants that they usually avoid. As such, **no plant is truly deer or bunny-proof**. To secure your plants, you may want to try surrounding more enticing plants with barrier plants like sage, lavender, daisies, and hyssop.
